CONTENTS

INDEX 57

This index is designed to quickly identify the STF 4 tables needed. Each table variable is listed alphabetically. Both the type of entry being tabulated (universe), which is shown in italics, and the relevant table numbers appear under the variable heading. If the entry variable is cross tabulated by another variable, the variable of cross tabulation is indicated beneath the universe and is preceded by the word "by." The index entries for each variable are arranged alphabetically by universe, then by variable of cross tabulation, if any. For example, if you are looking for a table tabulating age by sex for all persons, check the index under either of the variables. Checking under age, you find an entry for one table with a universe of persons. Checking the entry, you can see that age is cross tabulated by sex in table PB5.
