GENERAL INFORMATION

The Subject Locator is an index designed to quickly identify the tables (matrices) in the summary file. This index is arranged in alphabetical order by the name of a subject. Under each subject heading appears the universe or the type of entry being tabulated (shown in italics) and the relevant table number. Each variable is arranged alphabetically by universe, then by variable of cross tabulation, if any. If you are looking for a table tabulating age by sex for all individuals, check the index under either of the two variables (“age” or “sex”).

Please note that if the universe of a table (matrix) is “Households,” “Families,” “Occupied housing units,” “Population in households,” “Population in families,” or “Population in occupied housing units,” the universe is classified by the race or ethnic group, and ancestry group of the householder. See Appendix H, Characteristic Iterations, for the list of race, ethnic, and ancestry groups available for this summary file.
