Chapter 6.
Summary Table Outlines

Summary File 4 (SF 4) is repeated, or iterated, for the total population and 335 additional population groups: 132 race groups, 78 American Indian and Alaska Native tribe categories, 39 Hispanic or Latino groups, and 86 ancestry groups.

Tables for any population group excluded from SF 2 because the group’s total population in a specific geographic area did not meet the SF 2 threshold of 100 people are excluded from SF 4. In addition, all tables are shown for any of the above population groups only if there are at least 50 unweighted sample cases in a specific geographic area. For the ancestry iterations, only the 50 unweighted sample cases test can be performed. See Appendix H, Characteristic Iterations, for the list of race groups, American Indian and Alaska Native tribes, Hispanic or Latino, and ancestry groups available for this summary file.

In an iterated file such as SF 4, the universes for households, families, and occupied housing units are classified by the race or ethnic group of the householder (one of the 335 race and ethnic groups). The universe for subfamilies is classified by the race or ethnic group of the reference person for the subfamily. In a husband/wife subfamily, the reference person is the husband; in a parent/child subfamily, the reference person is always the parent. The universes for population in households, population in families, and population in subfamilies are classified by the race or ethnic group of the individuals within the household, family, or subfamily, without regard to the race or ethnicity of the householder. Notes follow selected tables to make the classification of the universe clear. In any population table where there is no Note, the universe classification is always based on the race or ethnicity of the person. In all housing tables, the universe classification is based on the race or ethnicity of the householder.
